The present volume is number eleven of the Alphabetical Index of the Births, Marriages, and Deaths recorded in the City of Providence, and is the first of a set of three volumes to contain an index of the births, marriages, and deaths recorded in this city for the years 1891 to 1900, inclusive.

It is an index of the births recorded for the above named years. It is printed from a card index which is made as the births are recorded.

The record of births in Providence is, as in all cities of the United States, far from complete, and it also contains very many errors. The cause of these defects, and the reason why the same name often appears with different spellings, are explained in the preface of volume IX.

The following table shows the number of births recorded each year from 1891 to 1900, inclusive, and also the birth rate, i.e., the number of living born to each 1,000 of the population:

The number of names in the above table does not correspond with the number in the preceding table, owing to the fact that additions have been made to the records since the publication of the Registration Reports, from which the data in the first table were taken, and that names are sometimes entered under different spellings, and finally because since 1891 children born to parents temporarily away from the city have not been reckoned under the births in the Registration Reports, although they have been entered upon the records.

CHARLES V. CHAPIN,

City Registrar.

Providence, August 2, 1905.
